SAO101: Intro to designing PCBs in KiCad

Josh Johnson

8/4/2019

Josh Johnson SAO101 8/4/2019 1/10

Overview

- What and why?
- Schematic Capture
- PCB Manufacturing
- Design rules
- Layout / Gerber generation
- Profit?

Project Files: bit.ly/CBRhardware

What's a Shitty Add On?

Cool PCBs

Josh Johnson SAO101 8/4/2019 3/10

What's a Shitty Add On?

"Standardised" Connector

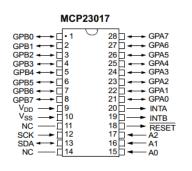

Red Circle is 3V3

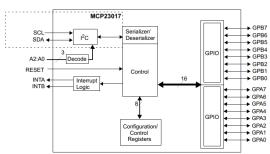

4 D F 4 B F 4 B F

https://hackaday.com/2019/03/20/introducing-the-shitty-add-on-v1-69 bis-standard/

Today's Design

Based around Microchip's MCP23017 I²C 16 Bit I/O expander

Allows control of 16 pins with just two inputs.

Can connect up to 8 MCP23017's to those same two pins.

128 controlled pins from a single I²C bus.

With Charileplexing, you could control 16256 LEDs!

Schematic Capture Time!

Enough theory, time to draw up the schematic.

Josh Johnson SAO101 8/4/2019 6 / 10

PCB Manufacturing Process

Figure 1 **Standard PCB Manufacturing Process** 1 - Data transfer from customer 9 - Strip resist 2 - Data prep

4 - Dry film resist coating

5 - Place artwork 6 - Expose panels to ultraviolet light 7 - Develop panels (resist removal)

8 - Etch

10 - Oxide coating

11 - Multilayer lamination 12 - Primary drilling

13 - Deburr and clean 14 - Desmear

15 - Copper deposition

16 - Dry film photoresist coat

17 - Expose and develop

18 - Copper pattern plate (electroplating)

20 - Etch

21 - Solder mask and cure

22 - Hot air solder leveling (most common PCB surface finish)

23 - Surface finishes

25 - Fabrication and routing

26 - Electrical test/final inspection

Design Rules

Need to ensure that our board can be fabricated (at a reasonable cost).

Josh Johnson SAO101 8/4/2019 8/10

Time to lay the board out!

This is the fun part!

Josh Johnson SAO101 8/4/2019 9/10

Feedback

Please let me know what you want these meetups to be.

- Workshop / Talks / Project Show & Tell / ?
- Topics to cover
 - Intro to Microcontrollers / Interfacing with the real world
 - Circuit Design
 - Rapid Prototyping
 - PCB Design, Manufacturing, and Assembly
 - Intro to FPGAs
 - Whatever you want!
